

NOW YOU CAN GET INTO POLE POSITION* AT HOME.

Prepare to qualify for Pole Position right in your living room. Because the #1 arcade hit of 1983 is now available for the ATARI® 2600™ Game and the Sears Video Arcade† systems. As well as an exclusive version for all ATARI Home Computers and the 5200™ SuperSystem.

No other racing game will demand your total concentration like Pole Position will. The hairpin curve will tax your reflexes. And avoiding accidents will challenge your ability to make split-second decisions.

Prepare yourself for the ultimate driving experience—Pole Position—the home version by Atari.  A Warner Communications Company
